

OpenKM Professional **Server** Price List

The “OpenKM Professional **Server**” license is for organizations that want to install OpenKM locally on their own Server.

The Professional version of OpenKM is continually growing with many improvements, more configuration properties and professional extensions that have been developed to provide greater benefits and services to our customers

Unlike our competitor products, we do not charge for individual modules separately: all modules / extensions / functionalities are available in our professional server packages, for one single price, free of additional charge

Some facts about OpenKM

- More than 30,000 installations worldwide assets
- A monthly average of 7,000 downloads of the Community version
- Available in 39 languages
- More than 20,000 members of the community
- 30 partners in the development of the application
- Partners in all continents
